SUMMARY

I have over three years of production experience building SaaS products, multi-tenant fintech systems, and AI automation. My work spans data modeling, background jobs, and reliable API design in TypeScript and Python.

EXPERIENCE

SDE 2 — Backend

March 2025 – Present

Finlens

- Migrated infrastructure from AWS to GCP.
- Built accountant dashboards, role-based access for firm employees, and accountant task management.

Full Stack Developer

July 2023 – March 2025

Finlens

- Built bank integrations and AI categorization for financial transactions.
- Integrated Stripe payments and revenue recognition accounting.
- Migrated ExpressJS to NestJS; implemented Docker and GitHub Actions CI/CD.
- Optimized APIs for financial report generation.

Frontend Web Developer Intern

March 2023 – July 2023

Stock Register

- Launched an inventory management web app with real-time asset visibility.
- Improved lists, filtering, and data fetching with React and TanStack Query.
- Standardized state management for complex workflows.

EDUCATION

Maulana Mazharul Haque Arabic & Persian University

December 2022 – December 2025

Bachelor of Technology (BTech), Information Technology · Patna

SKILLS

Backend & data TypeScript, NestJS, Python, FastAPI, PostgreSQL, MongoDB, TypeORM, SQLAlchemy, Rust

Infrastructure & async systems Docker, AWS, GCP Cloud Run, GitHub Actions, Redis, BullMQ, Celery, RabbitMQ

Frontend React, Next.js, Svelte, JavaScript, Tailwind CSS

SIDE PROJECTS & OPEN SOURCE

DevSummary - Web & Desktop

Built an AI-powered Git reporting app for founders and managers. The desktop app tracks GitHub branches, classifies commits, and generates scheduled or on-demand briefs using Electron, NestJS, React, and PGLite.

devsummary.com | [Desktop app](#) | github.com/VirtualPirate/devsummary-desktop

Tauri - Upload Plugin (Merged PR #1797)

Added upload and download speed reporting in Rust and exposed transferSpeed in TypeScript progress callbacks.

github.com/tauri-apps/plugins-workspace/pull/1797

ffmpeg-sidecar (2 merged PRs)

Replaced command-line curl with request downloads and external tar with Rust archive extraction for Linux, Windows, and macOS.
